

2011 SpacePak Systems & Application Training

SpacePak's state-of-the-art **SmartSystem** product offerings provide you with the newest, most innovative ways to provide valuable comfort system solutions to your customers while maximizing your profitability.

The **ORIGINATOR** of small duct high velocity (SDHV), SpacePak brings their vast experience and innovation through to their SmartSystem equipment. From ZonePak temperature zoning controls and ThermaPak high efficiency condensing "combi" boilers to the Chiller Series air-to-water heat pumps SpacePak provides total comfort solutions for all types of applications.

Training designed specifically for the HVAC contractor not only to introduce SpacePak's high efficiency product offerings but also educate in the proper application, design and service of the equipment.

Our SmartSystem high efficiency components are at the forefront of SDHV advancement and provide unique total comfort solutions for all types of applications. Flexibility and versatility well above conventional ducted and mini-split systems.

CERTIFIED... completion of the course outline qualifies attending technicians for Authorized Dealer Status. Authorized Dealers receive extended warranties on all installed products as well as marketing support assistance to help promote SpacePak in your specific territories.

Agenda

Day One Introducing SpacePak

Installation & Operation

Zoning – Installation & Operation

Chillers – Air to Water Heat Pumps
Installation & Operation

Boilers – High Efficiency ThermaPak "Combi" Units
Installation & Operation

Day Two Hands-on Lab

1) SpacePak "The System"

- A. System set-up, balance and operation using Air Control Module (ACM) technology.
- B. Tricks & Tips
- C. System Troubleshooting

2) ZonePak – Zoning SDHV

- A. 3 ways to Zone – Set up and System Balance
- B. Troubleshooting

3) Chiller & Boilers

- A. Typical System Set Up
 - Single Units
 - Multiple Units
- B. Controls

Seminar Instructor

Ted Brown

Instructor Ted Brown brings with him over 38 years of HVAC experience covering all facets of the industry from contracting and wholesale distribution to manufacturer representation and instructor for HVAC and refrigeration.

Ted's concentration for the last 13 years has been in small duct high velocity (SDHV) comfort systems primarily in new product development and marketing and education. From managing and instruction to designing course curriculum and the writing of technical support manuals Ted has an infinite amount of knowledge and is an industry leader in the SDHV market.

Dates

April 19 – 20 September 13 – 14

May 17 – 28 October 25 – 26

June 7 – 8 November 15 – 16
